

DR. WINDSOR SELECTED "NATIONAL OPTOMETRIST" OF THE YEAR

On June 24, 1999 in San Antonio, Texas, Dr. Richard Windsor received the American Optometric Association's "National Optometrist of the Year" Award. The award is given each year to only one doctor of optometry in the United States. It has been given only thirty-two times in history by the 32,000 member organization. Dr. Windsor was recognized for his work in the low vision care of macular degeneration patients and in his innovative rehabilitation of stroke and head injury patients. Dr. Windsor has lectured nationally on vision rehabilitation, and has contributed to books on low vision. Dr. Windsor was the 1973 recipient of the Fox Optical Award as the outstanding clinician at the Indiana University School of Optometry. The Indiana Optometric Association has also honored Dr. Windsor five times, including the Indiana Optometrist of the Year 1996 Award, the 1992 Distinguished Service Award, two Meritorious Service Awards 1987 and 1995, and the Young Optometrist of the Year Award in 1979. Dr. Windsor and Marjorie, his wife of 28 years, have five children, including three adopted special needs children.

It is especially gratifying to our staff, since we are also the only practice in the United States to have received this award twice. Dr. R. Lewis Scott, our senior doctor, received this award in 1984. We feel it says a lot about our staff's efforts to provide the highest quality professional low vision care for our patients.

Our practice website is located at eyeassociates.com. You will find information on low vision, request our literature or download maps for our locations. You can also reach our site by typing "low vision" in the Yahoo browser. We are on the first page in the low vision category.

Another of our sites is the Low Vision Gateway to the Internet at lowvision.org. It is a starting point to the low vision resources of the Internet. Low vision patients can find information on their eye problems and links to resources for the visually impaired.

We are also the designers of the Indiana Optometric Association website at www.ioa.org and the Neuro-Optometric Rehabilitation Association website at www.noravc.com

OUR FIVE CENTERS PROVIDE

THE LATEST IN LOW VISION CARE

The Eye Associates Group LLC., the 105 year old parent practice of the Low Vision Centers of Indiana is pleased to announce that we now have five low vision centers to serve low vision and head injury patients. Our centers in Fort Wayne, Indianapolis and Union City are limited to their specialties.

- THE LOW VISION CENTER OF INDIANAPOLIS (317) 844-0919
- THE VISION REHABILITATION CLINIC - FORT WAYNE (219) 432-0575
 - THE LOW VISION CENTER OF MARION (765) 664-9637
- THE LOW VISION CENTER - HARTFORD CITY (765) 348-2020
- THE LOW VISION CENTER OF UNION CITY (765) 964-5657

Our centers provide the latest in low vision technology, offering a range of rehabilitative devices from the simplest magnifiers to the latest electronic low vision aids. Our doctors have decades of experience in low vision care, have taught low vision courses across the United States and contributed to books on low vision.

We provide low vision care for all ages and have developed special programs to assist those with macular degeneration. Our doctors are experienced in bioptic driving and in the fitting of the visual field awareness prisms. We also prescribe a wide range of CCTV systems including those by Telesensory (Aladdin), Magnasight, Optelec, OVAC, MAX and Magna Cam. The new color and handheld CCTVs bring an exciting new dimension to low vision care. We were among the first in the Midwest to prescribe the new Ocutech Auto Focus Vision Enhancement System. this new device focuses automatically from 12 inches to infinity.
