

Pico

- > pocket-sized video magnifier
- > integrated rechargeable battery
- > full color and negative modes
- > magnification from 3X to 11X

Read the fine print anytime, anywhere! Pico fits easily in your purse or pocket, and the integrated battery makes it easy to carry wherever you go. With Pico, you can read even in dimly lit areas.

Created for convenience, Pico adds to Telesensory's line of portable video magnifiers. Pico is so small you will always want it with you—shopping for greeting cards, looking at price tags in stores and reading food ingredients in the supermarket. Easily view three-dimensional objects such as pill bottles on Pico's built-in color display. Fold-down legs allow you to write and sign checks or unfold one leg to tilt the screen toward you for reading.

Convenience is at your fingertips:

- > Read bills, schedules, grocery lists, receipts, menus and more in bright color or negative (white on black) mode.
- > Take it to the bank to read ATM instructions and transaction records.
- > Sign checks and bills, or write a quick note even when you're on the go!
- > Keep it with you using the convenient wrist strap and custom case.

Living with low vision just got easier. Wherever life takes you, equip yourself with a personal reader that goes the distance.

Telesensory > is the leading provider of magnification systems for people with low vision. We have restored independent living to more than 200,000 satisfied customers.
